

# TURTLEY COOL, DUDE!

Give this tropical turtle some groovy colour, then cut it out along the dotted lines and get ready to make it 3D.

## Make it 3D:

1. Put some glue or prestick on the little bit that says 'glue'.
2. Pull the shell together until the glue tab is covered by the other side. Press to make the two sides stick together.
3. You've got yourself a turtle! It's a perfect artwork as it is. You can also draw an ocean background on a piece of paper and paste it down on top. Or, stick it up on your bedroom wall!
