make your own
paper dinosaur feet

ILLUSTRATIONS: FREEPIK

How to build the T.Rex:

1. Carefully cut along the solid black lines, even the one that goes into her head. Do not cut the ones on her back just yet. Colour her in any way you like.
2. Fold the paper along all the dotted lines on her head, back and the bottom of her tail.
3. With the T.Rex still folded, cut along the three solid black lines on her back.
4. Stand her up and you've just created your own dinosaur!
